THE WORLD’S MOST BATTLE-PROVEN FIREARMS.
Dear valued customer,

I want to express my deepest gratitude for your loyalty to the FN brand. Our success has continued throughout our 130-year history, due in large part to customers like you, and 2019 stands to be a highly successful year.

From the first-ever double-stacked magazine used in the exceptional FN High Power, to the first-ever striker-fired pistol – the FN M1900 – to the development and standardization of NATO cartridges and the machine guns that fire them, FN has been synonymous with technological innovation in the firearms industry. And the result is our legacy of legendary products.

On the home front, FN embraced that pedigree and pushed the envelope in terms of development, delivery, and support of our products in the consumer and law enforcement marketplaces. The release of the FN 509® Tactical pistol completely upended the optics-ready pistol market, first cornered by FN nearly ten years earlier with the release of the FNP™-45 Tactical. And the end of the year culminated in the release of the newest commercial FN SCAR® rifle, the FN SCAR® 20S, based on the MK 20 SSR currently fielded within USSOCOM as their sniper support rifle. Lastly, the FN 509® Midsize joins the ranks of our U.S.-made pistols, perfect for concealed carry, yet delivering the performance of a full-sized pistol.

On the battlefront, FN’s machine guns continue to defend our men and women serving in harm’s way. We’ve secured contract renewals for the FN SCAR, new contracts for the MK 46 and MK 48, and continue to supply the Department of Defense with M60 and M240 machine gun variants and components. Additionally, we will see new developments unveiled for the U.S. Army’s Next Generation Squad Automatic Rifle, for which FN was awarded two opportunities to compete.

Our continued drive for consistency in product launches and inclusion of feedback from customers like you into our development process have primed us to deliver an exciting lineup of new products for you in 2019.

Thank you for choosing THE WORLD’S MOST BATTLE-PROVEN FIREARMS.®

Sincerely,

Mark Cherpes
President & CEO
FN America, LLC
WE ARE TESTED.

130 years of experience making small arms. And counting.

You’ll always find FN firearms on the front lines of the free world. From special forces to MPs, from base security to infantry, from airborne to seaborne, FN provides the large majority of battle-proven small arms carried by the U.S. military, because they know there’s nothing tougher, more reliable, or more accurate.
WE ARE ESSENTIAL.

Tactical firearms with a history of dependability.

Our tactical firearms are the stuff of legend. Every innovation is born in the battlefront, built for the home front, and tested in life’s most extreme environments. Our nation’s protectors trust FN firearms because they know ultimate dependability, masterful ingenuity, and legendary performance are embedded in our DNA.
WE ARE CONFIDENT.

A nation protected. A right preserved.

Compact, reliable, and battlefield-ready, FN firearms are held to the highest standard because we know who depends on them. When you’re carrying an FN pistol, you can be sure it has been crafted by the best, engineered to meet every demand, and built to perform whenever called upon.
WE ARE RELENTLESS.

Built to handle the battlefront. Available on the home front.

FN firearms are as tough, accurate, and reliable in your hands as they are in the hands of our nation's protectors. From compact pistols to shotguns to rifles, every FN firearm takes uncertainty out of the equation, so you can depend on them every minute of every day. Preparedness is our mission. Peace of mind is our objective.
WE ARE BRAVE.

Protecting those who protect you.

Nobody holds their firearms to a higher standard. Nobody has the heritage, knowledge, or experience that we have earned with 130 years of protecting the battlefront and the home front. Our lineage is pure, our performance is uncompromised, our dedication to innovation and improvement is unceasing. You can be sure every pistol, shotgun, and tactical rifle has been designed with nothing but perfection in mind.
WE ARE INNOVATORS.

We never cease in our pursuit of greatness.

As today’s demands change, our mindset stays the same: being the world’s most battle-proven firearms.

Our engineers devote their lives to tactical technology and firearm innovation for those who devote their lives to our liberty. Whenever a new challenge is faced, FN will build a solution. That is our promise.
WE ARE PROTECTORS.

Handguns built with a purpose: protecting our legacy.

The vision set forth by John M. Browning continues to inspire our pistol line. From the iconic FN Five-seveN®, the FN 509™ Tactical, and FN 509™ striker-fired, polymer-framed pistols to the compact and powerful FNS™-9 Compact, no other manufacturer can match our history, heritage, knowledge, and experience. Depend on the battle-tested know-how of FN for peace of mind on the home front.
Primary Features
- Slide (front sight: adjustable)
  - 3.5 to 7.5 lb. trigger pull
- FN Low-Profile Optics-Mounting System™
- Threaded barrel
- Suppressor-height night sights
- Slide
  - Sight-protecting slide cap
  - External extractor, round chamber reducer

Barrel
- Cold hammer-forged stainless steel
- Recessed target crown
- Polished chamber and feed ramp
- Threaded 0.5"x28 TPI barrel
- O-ring retention thread cap

Frame
- Enhanced grip texture which enables faster follow-up shots in all conditions
- Interchangeable backstraps
- MIL-STD-1913 accessory mounting rail

Operating Controls
- Fully ambidextrous slide stop lever and magazine release

Magazine
- High-capacity, drop-free floorplate
- Sear lever-key with two steel pins
- 17-20 Rd., 2-24 Rd. Magazines included

Optics Revolutionizes the Optics-Ready Pistol
Optics technology is rapidly advancing, but existing mounting systems had failed to keep pace. The FN 509® Tactical’s slide and mount are specifically designed to allow nearly all major optics brands available today to seamlessly mount and allow for co-witness with iron sights. The interchangeable plates, provided with the pistol, are equipped with an O-ring that provides positive tension to the plate and optic, ensuring the lowest, most secure mount possible. Finally, the fine-threaded Torx screws lock tightly and remove any need for thread locker.

WE ARE UNDISPUTED.

Our military-contracted, fully automatic firearms adapt to every battlefield.

The FN belt-fed machine guns, select-fire rifles and carbines, and more, are the ultimate force multiplier: unrelenting, incredibly reliable, and battle-tested by the world’s finest troops. Start with the legendary FN® M240 (also known as the FN MAG® or FN MAG®58), the medium machine gun choice of the U.S. military for more than 40 years, and the best friend an infantry squad will ever have. As our heritage has evolved, so too has our firepower. No matter the mission, no matter the environment, the modular and mission-adaptable FN® MK 16 and FN® MK 17 are the choice of individual warfighters worldwide. The FN® MK 16 (.556x45mm) and the FN® MK 17 (.7.62x51mm) are modular, designed to be instantly adaptable to local conditions and needs. These are the machine guns, rifles, and carbines whose reliability and toughness make them the world’s most battle-proven firearms.
FN® MK 16: Lightweight, Adaptable, Modular, and Accurate.

Primary Features
- Compact design; select fire
- Short-stroke gas piston
- Composite polymer trigger module

Receiver
- Hard-anodized monolithic aluminum receiver
- MIL-STD-1913 accessory rails at 3, 6, 9, and 12 o'clock positions

Barrel
- Cold hammer-forged, chrome-lined, free-floating barrel
- Barrels can be changed at the operator level in under 5 minutes with a point of impact shift of less than 1 MOA from previously established zero.

Stock
- Telescopic design; composite polymer construction
- Side-folding feature provides a compact package in aircraft and vehicle deployments; can still be fired from the folded position

Operating Controls
- Ambidextrous selector lever and magazine release
- Enlarged trigger guard for easier access when wearing gloves
- Adjustable gas regulator for use with sound suppressor to maintain constant rate of fire

Magazine
- Steel body; low-friction, anti-tilt follower
- Compatible with M16/M4 magazines

FN® MK 16 LB (LONG BARREL)
- Caliber: 5.56x45mm
- Magazine: 30 Rd.
- Cyclic Rate of Fire: 625 RPM
- Effective Range: 800m point target
- Barrel Length: 18"
- Overall Length: 39.0" (extended); 36.5" (collapsed); 29.0" (folded)

FN® MK 16 (STANDARD)
- Caliber: 5.56x45mm
- Magazine: 30 Rd.
- Cyclic Rate of Fire: 625 RPM
- Effective Range: 600m point target
- Barrel Length: 14"
- Overall Length: 35.0" (extended); 32.5" (collapsed); 25.0" (folded)

FN® MK 16 CQC (CLOSE QUARTERS COMBAT)
- Caliber: 5.56x45mm
- Magazine: 30 Rd.
- Cyclic Rate of Fire: 625 RPM
- Effective Range: 400m point target
- Barrel Length: 10"
- Overall Length: 31.0" (extended); 28.5" (collapsed); 21.0" (folded)

MILITARY RIFLES AND CARBINES
FN® MK 17 Lightweight, Adaptable, Modular, and Accurate.

Primary Features
- Compact design; select fire
- Short-stroke gas piston
- Composite polymer trigger module
- Receiver
  - Hard-anodized monolithic aluminum receiver
  - MIL-STD-1913 accessory rails at 3, 6, 9, and 12 o'clock positions
- Barrel
  - Cold hammer-forged; chrome-lined, free-floating barrel
  - Barrels can be changed at the operator level in under 5 minutes with a point of impact shift of less than 1.5 MOA from previously established zero
  - Highly effective flash hider/QD suppressor interface
- Stock
  - Telescopic design; composite polymer construction
  - Side-folding feature provides a compact package in aircraft and vehicle deployments; can still be fired from the folded position

Operating Controls
- Ambidextrous selector lever and magazine release
- Enlarged trigger guard for easier access when wearing gloves
- Adjustable gas regulator for use with sound suppressor to maintain constant rate of fire

Magazine
- Steel body; low-friction, anti-tilt follower
- Extended base pad for improved ergonomics

FN® MK 17 LB (LONG BARREL)
- Caliber: 7.62x51mm
- Magazine: 20 Rd.
- Cyclic Rate of Fire: 600 RPM
- Effective Range: 900m point target
- Barrel Length: 20"
- Overall Length: 42.0" (extended); 39.5" (collapsed); 32.0" (folded)

FN® MK 17 (STANDARD)
- Caliber: 7.62x51mm
- Magazine: 20 Rd.
- Cyclic Rate of Fire: 600 RPM
- Effective Range: 700m point target
- Barrel Length: 16"
- Overall Length: 38.0" (extended); 35.5" (collapsed); 28.0" (folded)

FN® MK 17 CQC (CLOSE QUARTERS COMBAT)
- Caliber: 7.62x51mm
- Magazine: 20 Rd.
- Cyclic Rate of Fire: 600 RPM
- Effective Range: 500m point target
- Barrel Length: 13"
- Overall Length: 35.0" (extended); 32.5" (collapsed); 25.0" (folded)

FULL FN® MK 17 SPECS: PAGE 119
FN® MK 13 EGLM

The FN® Enhanced Grenade Launcher Module (FN® MK 13 EGLM) is one of the NATO standard launchers available from FN. It is fully retractable and does not present a problem when not in use. It can be quickly mounted underneath the FN® MK 16 or FN® MK 17, or it can be used as a stand-alone launcher with a telescoping buttstock. It is tested, inspected, and approved for use by the U.S. Armed Forces.

- Weight: 2.96 lb. for FN® MK 16 (empty); 3.0 lb. for FN® MK 17 (empty); 5.92 lb. stand-alone (empty)

Enhanced Fire Support.

AS9100C/EN9100:2009 certified. MK 13 EGLM. For military and law enforcement sales only.

FULL FN® MK 13 EGLM / FN® FCU MK3 SPECS: PAGE 119

FULL FN® MK 13 EGLM / FN® FCU MK3 SPECS: PAGE 119

The FN® Enhanced Grenade Launcher Module (FN® MK 13 EGLM) accepts all NATO standard 40mm low-velocity grenades. It may be quickly mounted underneath the FN® MK 16 or FN® MK 17, or it may be configured as a stand-alone launcher with a telescoping buttstock. It is tested, inspected, and approved for use by the U.S. Armed Forces.

- Effective Range (low-velocity grenades): 100m point target; 300m area target

The FN® Enhanced Grenade Launcher Module (FN® MK 13 EGLM) accepts all NATO standard 40mm low-velocity grenades. It may be quickly mounted underneath the FN® MK 16 or FN® MK 17, or it may be configured as a stand-alone launcher with a telescoping buttstock. It is tested, inspected, and approved for use by the U.S. Armed Forces.

- Weight: 2.96 lb. for FN® MK 16 (empty); 3.0 lb. for FN® MK 17 (empty); 5.92 lb. stand-alone (empty)

FN® FCU MK3

Designated as the Enhanced Fire Support Module (FN® FCU), it provides advanced electronics to simplify range finding and elevation corrections for the operator, even under severe combat conditions. It can be used as an additional sight device for use with any 40mm grenade launcher, stand-alone, and interface to and provide alignment to the rifle sights.

- Flashing reticle indicator allows correction for left/right misalignment
- Remotely mounted pressure switch with ruggedized connector/connector port
- Housing allows easy installation of rifle optic, thermal or infrared sights
- Baudat computer rapidly calculates range solutions and stores up to 15 different types
- Housing features an optical sightfinder with a wide-angle, haunched or full rifle scope
- Temperature sensor allows correction in firing solutions

FN® MK 13 EGLM

- Automatic operation
- Composite exterior trigger module
- Automatic selector switch for rapid selection of feed case
- Optimized ergonomic trigger location when mounted to either the FN® MK 16 or FN® MK 17
- Dual locking clamps prevent accidental release of the FN® MK 13 EGLM

The FN® Enhanced Grenade Launcher Module (FN® MK 13 EGLM) accepts all NATO standard 40mm low-velocity grenades. It may be quickly mounted underneath the FN® MK 16 or FN® MK 17, or it may be configured as a stand-alone launcher with a telescoping buttstock. It is tested, inspected, and approved for use by the U.S. Armed Forces.

- Effective Range (low-velocity grenades): 100m point target; 300m area target

The FN® Enhanced Grenade Launcher Module (FN® MK 13 EGLM) accepts all NATO standard 40mm low-velocity grenades. It may be quickly mounted underneath the FN® MK 16 or FN® MK 17, or it may be configured as a stand-alone launcher with a telescoping buttstock. It is tested, inspected, and approved for use by the U.S. Armed Forces.

- Weight: 2.96 lb. for FN® MK 16 (empty); 3.0 lb. for FN® MK 17 (empty); 5.92 lb. stand-alone (empty)

FN® FCU MK3

- Undetectable and eye-safe laser range finder effective: 1,000m effective range (1.5 x 1.5m target, 5 km visibility, 28% target reflection)
- Only one battery (CR123)
- Quick release attachment compatible with MIL-STD-1913 rail
- IR laser pointer Class 1/3B
- IR laser safety feature with a dedicated switch or by using a high-visibility blue training cable

Military rifles and carbines
**Primary Features**
- Semi-automatic
- Releasing locking bolt
- Composite polymer trigger module
- Scope rail of suppressed fire

**Receiver**
- Hard-anodized monolithic aluminum receiver
- MIL-STD-1913 accessory rails at 3, 6, 9, and 12 o’clock positions

**Barrel**
- Cold hammer-forged, chrome-lined barrel
- Fully free-floating design
- Can be removed/replaced by the operator
- Flash hider optimized for suppressed fire

**Stock**
- Non-folding and adjustable length of pull without tools
- Aluminum and polymer construction

**Operating Controls**
- Ambidextrous selector lever and magazine release
- Charging handle may be mounted on right or left side
- Adjustable gas regulator for use with or without suppressor

**Magazine**
- Steel body; low-friction follower
- Extended base pad

**FN® MK 20 SSR**
- Caliber: 7.62x51mm
- Magazine: 10/20 Rd.
- Operation: Short-stroke gas piston
- Effective Range: 1,000m point target
- Overall Length: 42.5” (extended); 40.5” (collapsed)

[Full FN® MK 20 SSR specs: Page 119]
FN® M249 SAW/FN® M249 PARA The Ultimate Force Multiplier.

AS9100C/EN9100:2009 certified. For law enforcement and military sales only.

**Primary Features**
- Open-bolt operation; belt-fed
- Matte black non-reflective finish
- Comes with an adjustable titanium bipod
- Receiver
  - Forward assist with right-side ejection port
  - Rails for attaching on tripod and vehicle mounts
- **Receiver**
  - Formed steel frame with right-side ejection port
  - Holes for attaching on tripod and vehicle mounts
  - Top cover with integrated MIL-STD-1913 mounting rail for sighting systems.
- **Barrel**
  - Changeable cold hammer-forged steel
  - Hard chrome-plated bore and chamber
- **Stock**
  - Highly ergonomic polymer high-impact assembly with buffer, recoil buffer system, and hydraulic recoil buffer system on FN® M249 SAW
  - Forward assist metal latchlock assembly with hydraulic rear buffer system and compensator brake on FN® M249 PARA
  - Kit consisting of polymer high-impact and 20.5" barrel for conversion FN® M249 PARA to FN® M249 SAW configuration is available

**Operating Controls**
- Cross-bolt safety
- Curved trigger for improved finger position and control in rapid fire
- Non-reciprocating charging handle
- Ambidextrous feed cover latches
- Removable trigger guard for use with Arctic gloves

**Feed System**
- Belt feed from left side
- Interface under the receiver for box or pouch holding 100- or 200-round belt
- Feeds M16-type magazine without any modification to the weapon

**MILITARY MACHINE GUNS**

**FN® M249 SAW**
- **Caliber:** 5.56x45mm
- **Cyclic Rate of Fire:** 850 RPM
- **Effective Range:** 800m
- **Maximum Range:** 3,600m
- **Barrel Length:** 20.5"
- **Overall Length:** 40.75" (extended);
- 31.75" (collapsed)

**FN® M249 PARA**
- **Caliber:** 5.56x45mm
- **Cyclic Rate of Fire:** 850 RPM
- **Effective Range:** 800m
- **Maximum Range:** 1,800m
- **Barrel Length:** 16.3"
- **Overall Length:** 36" (extended);
- 30.5" (collapsed)

Also known as the FN MINIMI®
Primary Features
- Open-bolt operation, bolt feel
- Matte black non-reflective finish
- Comes with an adjustable titanium stock

Receiver
- Formed steel frame with right-side ejection port
- Receiver is designed to support a tripod
- Top cover with integrated MIL-STD-1913 mounting rail for sighting systems

Barrel
- Changeable Cold hammer-forged steel
- Hard chrome-plated bore and chamber

Stock
- Highly ergonomic polymer buttstock assembly with hydraulic recoil system and nonslip buttplate
- Optional rotating, telescoping metal buttstock assembly with hydraulic recoil system and nonslip buttplate

Operating Controls
- Cross-bolt safety
- Curved trigger for improved finger position and control in rapid fire
- Non-reciprocating charging handle
- Ambidextrous feed cover latches
- Removable trigger guard for use with Arctic gloves

Feed System
- Belt feed from left side
- Interface under the receiver for box or pouch holding 100- or 200-round belt

FN® MK 46 MOD 1
- Caliber: 5.56x45mm
- Cyclic Rate of Fire: 750 RPM
- Effective Range: 800m point target
- Maximum Range: 1,800m
- Barrel Length: 16.3" 
- Overall Length: 36.22"

FN® MK 48 MOD 1
- Caliber: 7.62x51mm
- Cyclic Rate of Fire: 730 RPM
- Effective Range: 800m point target
- Maximum Range: 3,600m
- Barrel Length: 19.75" 
- Overall Length: 39.75"

FN® MK 46 MOD 2
- Caliber: 5.56x45mm
- Cyclic Rate of Fire: 750 RPM
- Effective Range: 800m point target
- Maximum Range: 1,800m
- Barrel Length: 16.30" 
- Overall Length: 34.11-37.11"
### FN® M240 SERIES

**Primary Features**
- Open-bolt operation
- Belt-fed with quick change barrel
- Receiver: Gas-operated, solid steel frame on all models except FN® M240L (titanium)
- Fires from the open-bolt position to reduce heat buildup and potential for chambered round cook-off
- Multiple integrated MIL-STD-1913 mounting rails for optics, lights, and laser devices
- Holes for attaching on tripod and vehicle mounts
- Top cover with integrated MIL-STD-1913 mounting rail for sighting systems

**Barrel**
- Cold hammer-forged steel; air-cooled design

**Stock**
- Highly ergonomic polymer buttstock assembly with hydraulic recoil buffer system and optional forward MIL-STD-1913 rails
- Ability to mount on a bipod, tripod vehicle, or aircraft (FN® M240C/FN® M240D/FN® M240H)
- Optional Egress Kit for converting pintle-mount models to ground fire support configuration (FN® M240C/FN® M240D/FN® M240H)

### FN® M240B

- Cyclic Rate of Fire: 550 to 650 RPM
- Gas Regulator: Single-port
- Barrel Length: 21.7" (FN® M240B/FN® M240L)
- Other Specs: Titanium receiver; composite trigger grip; titanium front sight; lightweight barrel (5.8 lb.)

### FN® M240L

- Cyclic Rate of Fire: 650 to 950 RPM
- Gas Regulator: 3-port
- Barrel Length: 21.7"
- Overall Length: 41.6"
- Other Specs: Right-hand feed system

### FN® M240/M240C

- Cyclic Rate of Fire: 550 to 650 RPM
- Gas Regulator: Single-port
- Barrel Length: 21.7"
- Overall Length: 41.6"
- Other Specs: Optional forward MIL-STD-1913 rails; offset charging handle; open-pronged flash hider

### FN® M240H

- Cyclic Rate of Fire: 650 to 950 RPM
- Gas Regulator: 3-port
- Barrel Length: 21.7"
- Overall Length: 41.6"
- Other Specs: Offset charging handle

### FN® M240D

- Cyclic Rate of Fire: 485 to 635 RPM
- Effective Range: 1,850m (area target)
- Maximum Range: 6,500m (grazing fire)
- Overall Length: 65.1"
- Weight: 84 lb. (empty)
- Other Specs: 26 to 42.77 lb. trigger sear maximum pull; 0.3" trigger travel to discharge

---

### FN® M240B-QCB

- Unbeatable Long-Range Firepower: AS9100C/EN9100:2009 certified. For law enforcement and military sales only.

- **Primary Features**
  - Gas-operated, short-recoil barrel operation
  - Receiver: Proven service life in excess of 100,000 rounds
  - Barrel: Hammer-forged steel; 18,000-round service life, high-temperature-resistant alloy barrel; 10,000-round service life chrome barrel
  - Quick Change Barrel (QCB) feature allows the barrel to be quickly exchanged by one operator and eliminates the need to check and adjust headspace and timing at the user level
  - Compatible with any and all FN QCB barrels

- **Mount**
  - Compatible with many armored vehicle and naval craft mounts
  - Adjustable MG ground mount tripod with leveling mechanism to provide accurate fire on pre-established targets

- **Operating Controls**
  - Dual spade grips for enhanced control in burst and sustained fire
  - Right-hand cocking handle for easy operator access
  - Trigger safety system

- **Feed System**
  - NATO standard .50-caliber belt-linked ammunition
  - Left- or right-hand belt feed design readily adapts to a variety of mounting positions and available space
  - Left- or right-hand link ejection
  - Bottom-feed case ejection

---

### FN® M2HB-QCB

- Unbeatable Long-Range Firepower: AS9100C/EN9100:2009 certified. For law enforcement and military sales only.

- **Primary Features**
  - Closed-bolt design; short-recoil barrel operation
  - Receiver: Projected service life in excess of 180,000 rounds
  - Barrel: High-temperature-resistant alloy barrel
  - Quick Change Barrel (QCB) feature allows the barrel to be quickly exchanged by one operator
  - Operating Controls: Customized for enhanced control in burst and sustained fire
  - Right-hand cocking handle for easy operator access
  - Trigger safety system

- **Feed System**
  - NATO standard .50-caliber belt-linked ammunition
  - Length of boat tail
  - Muzzle velocity: 850 to 900 ft/s
  - Effective Range: 1,850m (area target)
  - Maximum Range: 6,500m (grazing fire)
  - Other Specs: 26 to 42.77 lb. trigger sear maximum pull; 0.3" trigger travel to discharge
Primary Features

Open-bolt operation
LDS 5 / 7: M3M cyclic rate of fire
Receiver
Solid steel frame for durability
Open-bolt operation limits heat buildup to reduce cook-off
Barrel
Cold hammer-forged steel; 10,000-round life
Enhanced flash suppressor reduces burns
Enhanced flash suppressor improves compatibility with current night vision equipment
Perforated barrel jacket for improved cooling and longer life
Mount
Provides optimal field of fire with aircraft’s centerline for wider target coverage
Provides -70 degrees maximum depression angle for wider target coverage
Reduces recoil for both operator and airframe
Dual buffer system for reduced recoil forces
Mounted on elastic cradle system for increased accuracy with reduced wear and vibration

Operating Controls
Vibration-isolated dual spade grips
Manual recocking lever reduces charging effort required
MIL-STD-1913 mount for sighting and target designation systems feed

Feed System
NATO standard belt-fed disintegrating link feed system for added reliability
Flexible ammunition feed chute system reduces misfeeds
Accepts ammunition boxes from 100 to 600 rounds, for greater mission versatility
Left- or right-side ammunition feeding without extra components

• Operation: Short recoil
• Effective Range: 2,500m
• Maximum Range: 6,500m
• Barrel Length: 36"
• Overall Length: 64.8"
• Height: 7.6"
• Weight: 81.6 lb. (empty)

FN® M3M (GAU-21)
Caliber: .50 (12.7x99mm)

The Next Generation in .50-Caliber Machine Guns.

MILITARY WEAPONS SYSTEMS
FN® M3P  The Next Generation in Machine Guns.

Primary Features

- Cycles: 20-25,000 rpm (ratio of fire:

  Short recoil suppressed)

  Programmable burst via Armament

  Management System

Receiver

- Solid steel frame for durability

Barrel

- Cold hammer-forged steel, 10,000 round life

  Enhanced flash hider for reduced firing

  Signature to improve compatibility with

  Current single-sided night vision

  Perforated barrel jacket for improved cooling

  and longer life

Mount

- Designed for aircraft use with FN

  pod systems, fixed-forward gun

  mounts, and in-wing applications

  Dual buffer system for reduced recoil forces

  Mounted on elastic cradle system for increased

  accuracy with reduced wear and vibration

FN® M3P

- Caliber: .50 (12.7x99mm)

- Weight: 80.5 lb. (empty, short standard flash

  hider); 82 lb. (empty, long standard flash

  hider)

  - Other Info: Especially designed for airborne

  operations; solenoid firing; compatible with a

  wide range of “mission-tailored” ammunition;

  left- or right-side ammunition feeding without

  extra components

Cyclic Rate of Fire

- 1,025 +/- 75 RPM

  Programmable burst via Armament

  Management System

Programmable Burst

- Via Armament Management System

Barrel Life

- 10,000 rounds

Flash Hider

- Enhanced flash hider offers reduced firing

  signature to increase compatibility with

  current night vision equipment

Mounting System

- Designed for aircraft use with FN

  pod systems, fixed-forward gun

  mounts, and in-wing applications

- Dual buffer system for reduced recoil forces

- Mounted on elastic cradle system for increased

  accuracy with reduced wear and vibration

Weight

- 80.5 lb. (empty, short standard flash

  hider); 82 lb. (empty, long standard flash

  hider)

- Other Info: Especially designed for airborne

  operations; solenoid firing; compatible with a

  wide range of “mission-tailored” ammunition;

  left- or right-side ammunition feeding without

  extra components
FN® PINTLE SYSTEMS  FN Makes the Mounts to Meet Your Mission.

A machine gun is only as effective as its mounting system. FN builds a full line of pintles for each of our machine guns that provide a secure mounting interface for rotary-wing aircraft, naval craft, and ground vehicles. FN® pintle systems are used by the U.S. military and allied forces worldwide, providing warfighters with the significant firepower advantage they need in every operational engagement.

FN® LBP (LIGHT BOAT PINTLE)
For Sea Use Only.
Capacity: 250 Rd.
- Designed for use with the FN® M240 machine gun
- Light pintle head with soft mount
- Telescopic column with firing stops in azimuth
- Traverse Capability: 360 degrees
- Elevation Angle: +60 to -10 degrees
- Width: 22"
- Link and case collector
- Weight: 128 lb. with weapon and ammunition
- Height: 72.1"

FN® LPH (LIGHT PINTLE HEAD)
For Land and Sea Use.
Capacity: 250 Rd.
- Designed for use with the FN® M240 machine gun
- Elastic cradle and travel lock mechanism
- Link and case collector (optional)
- Traverse Capability: 360 degrees
- Elevation Angle: +60 to -10 degrees
- Width: 20.5"
- Weight: 61 lb. with weapon and ammunition
- Height: 13.2"
**FN® PINTLE SYSTEMS**

*Fn Makes the Mounts to Meet Your Mission.*

AS9100C/EN9100:2009 certified. For U.S. military sales only.

---

**FN® MBP**

**FN® MBP (MEDIUM BOAT PINTLE)**

For Sea Use Only.

- **Capacity:** 100 Rd.
- **Designed for use with the FN® M2HB-QCB machine gun.
- **Medium pintle head with shoulder rests and quick locking/delocking device.
- **Telescopic column with firing stops in azimuth.
- **Traverse Capability:** 360 degrees
- **Elevation Angle:** +49 to -15 degree angle of elevation/depression range.
- **Weight:** 546 lbs. with weapon; 96 lbs. armor plate and shoulder rests.
- **Height:** 72.8".

---

**FN® MVP**

**FN® MVP (MEDIUM VEHICLE PINTLE)**

For Land and Sea Use Only.

- **Capacity:** 300 Rd.
- **Designed for use with the FN® M3M (GAU-21) machine gun.
- **Traverse Capability:** 360 degrees
- **Elevation Angle:** +55 to -15 degree angle of elevation/depression range.
- **Telescopic column with firing stops in azimuth (cf FN® MBP).
- **Weight:** 275.6 lbs. with weapon and 300 rounds of ammunition.

---

**FN® MDP (MEDIUM DOOR PINTLE)**

Turning

For Airborne Use Only.

- **Capacity:** 300-Rd. Quick Release Ammunition Box with Flexible Feed Chute.
- **Designed for use with the FN® M3M (GAU-21) machine gun.
- **Two flexible chutes for ammunition feed and link collection.
- **Traverse Capability:** 180 degrees, adjustable per mission configuration.
- **Depression Angle:** 0 to -60 degrees, depending on carrier integration.
- **Elastic weapon cradle assembly with dual trigger.
- **Weight:** 517 lbs. with weapon and 300 rounds of ammunition.
FN® MRP (MEDIUM RAMP PINTLE)
For Airborne Use Only.
Capacity: 300-Rd. Quick Release Ammunition Box with Flexible Feed Chute
• Designed for use with FN® M3M (GAU-21) machine gun
• Elastic weapon cradle assembly with dual triggers
• Fired case deflector
• Azimuth rotating yoke assembly with 172 degrees of traverse
• Flexible links chute with downward ejection
• Depression Angle: 0 to -70 degrees

FN® PINTLE SYSTEMS
FN Makes the Mounts to Meet Your Mission.
AS9100C/EN9100:2009 certified. For U.S. military sales only.

MILITARY WEAPONS SYSTEMS
FN® POD SYSTEMS For Helicopters and Subsonic Fixed-Wing Aircraft.

Primary Features

Accepts one FN® M3P machine gun
1,025 ± 75 RPM cyclic rate of fire per gun/pod
FN® PC 17 Pod Control Panel features ARM/SAFE functions, remote recocking, programmable burst limit and rounds count
Capability of emergency jettison from the aircraft fireing simultaneously as well as safety and cocking device

A. Safety and Cocking Device
This system incorporates safety mechanisms in the recocking device so that there are no chambered rounds until the system is armed to fire. The machine gun can be remotely recocked in flight.

B. Ammunition Box
The FN® HMP250 (250-round capacity) or FN® HMP400 (400-round capacity) ammunition box is reversible and allows feeding from the left or right side without extra components. Its design guarantees smooth movement of the ammunition belt with no risk of jamming or fouling due to aircraft maneuvers or acceleration.

C. Boresighting Device
An elevation and azimuth adjustment device enables the gun to match the carrier aircraft’s optical sighting line.

D. Soft Mount
The recoil forces that occur when the weapon is fired can be a source of structural fatigue on the carrier aircraft and can also reduce the precision of the gun. In FN® pod systems, the machine gun is fitted on a soft mount that absorbs the recoil forces.

E. Spent Link and Fired Case Collector
All of the cases and links are collected in the Link and Case Collector (LCC).

FN® HMP250 POD
- Capability: .75 Mach
- Capacity: 250 Rd.
- Weight: 194 lb. (empty); 257 lb. (loaded)
- Height: 16.1" exterior pod
- Length: 71.3" exterior pod
- Other Info: Fired link and case collector on the FN® HMP250 LCC

FN® HMP400 POD
- Capability: .75 Mach
- Capacity: 400 Rd.
- Weight: 197 lb. (empty); 305 lb. (loaded)
- Height: 17.1" exterior pod
- Length: 76.4" exterior pod
- Other Info: Fired link and case collector on the FN® HMP400 LCC

FN® RMP POD
- Capability: .70 Mach
- Capacity: 250 Rd.
- Weight: 212 lb. (empty); 351 lb. (loaded with three rockets)
- Height: 17.1" exterior pod
- Length: 76.4" exterior pod
- Three 2.75"/70mm rocket launcher tubes
- Fired link collector
- Accepts all NATO standard 2.75"/70mm FFARs to include laser-guided rockets (LGR)

FN® PC 17 POD CONTROL PANEL
FN® BT14-2 ARMAMENT MANAGEMENT SYSTEM

G. Soft Mount
The recoil forces that occur when the weapon is fired can be a source of structural fatigue on the carrier aircraft and can also reduce the precision of the gun. In FN® pod systems, the machine gun is fitted on a soft mount that absorbs the recoil forces.

C. Spent Link and Fired Case Collector
All of the cases and links are collected in the removable Link and Case Collector (LCC).
Primary Features
- Accepts all current FN® M249, FN® MK 48, FN® M240, FN® M2HB-QCB machine guns, and future FN® guns

Sensors
- Based on customer requirements
  - Color CCD camera for normal light conditions
  - Fully modular sensor system allows for integration of multiple day/night cameras and target systems

Laser range finder/ballistic computer combination reduces distance-related aiming error

Mount
- Lightweight for easy installation on vehicles and ground-mounted applications
  - Low silhouette reduces target size and minimizes visual intrusion in sensitive areas
  - Soft recoil mount improves hit probability, reducing collateral damage

Control
- Operator display console for target identification/engagement
  - Single control handle for sight selection, aiming, and firing
  - Built-in test (BIT) system for diagnostics/failure detection

Available Options
- Thermal/Infrared cooled or uncooled camera for low-light/low-visibility conditions
- Laser range finder/ballistic computer
- STANAG 4569 Level I or Level II ballistic protection
- Stabilized for firing on the move
- Interface with slew-to-cue sensors such as Laser Warning Receiver (LWR) and Small Arms Detection and Localization System (SADLS)
- Target tracking system
- Backup firing mode

Sea deFNder® Remote Weapons Stations
Maximized Force - Minimized Risk.
AS9100C/EN9100:2009 certified. For U.S. military sales only.

Primary Features
- Accepts all current FN® M249, FN® MK 48, FN® M240, FN® M2HB-QCB machine guns, and future FN® guns

Sensors
- Based on customer requirements
  - Color CCD camera for normal light conditions
  - Fully modular sensor system allows for integration of multiple day/night cameras and target systems

Laser range finder/ballistic computer combination reduces distance-related aiming error

Mount
- Lightweight for easy installation on vehicles and ground-mounted applications
  - Low silhouette reduces target size and minimizes visual intrusion in sensitive areas

Control
- Operator display console for target identification/engagement
  - Single control handle for sight selection, aiming, and firing
  - Built-in test (BIT) system for diagnostics/failure detection
**deFNder® Light REMOTE WEAPONS STATIONS**

Maximized Force – Minimized Risk.

AS9100C/EN9100:2009 certified. For U.S. military sales only.

**Primary Features**
- Accepts all current FN® M249 SAW, FN® MK 48 MOD 1, and FN® M240B infantry machine guns
- Sensors:
  - Based on customer requirements
  - Close-CCD camera for normal light conditions
  - Fully modular network system allows for easy integration of mud day/night cameras and targeting systems
  - Laser range finder/ballistic computer combination reduces distance-related aiming error
- Mount:
  - Lightweight for easy installation on vehicles and ground-mounted applications
  - Soft recoil mount increases hit probability, reduces collateral damage
  - Machine gun can be quickly dismounted for infantry use
- Control:
  - Operator display console for target identification/engagement
  - Single control handle for sight selection, aiming, and firing
  - Built-in Test (BIT) system for diagnostics/failure detection

**Available Options**
- Thermal cooled or uncooled camera for low-light-low-visibility conditions
- Laser rangefinder/ballistic computer
- STANAG 4569 Level I ballistic protection
- Sensor package includes visible light cameras and/or IR sensors
- Laser Warning Receiver (LWR) and Small Arms Detection and Localization System (SADLS)
- Target tracking system
- Up-capacity ammunition boxes of 600 rounds (7.62x51mm linked) and 1,050 rounds (5.56x45mm linked)
- Fired case and link collection
- Weapon protective cover
- Image stabilization
- Auto-detection

**deFNder® LIGHT**
- 18 to 32 Volts Direct Current (VDC) power meeting MIL-STD-1275; qualification standards MIL-STD-810, MIL-STD-461, and MIL-STD-464
- Traverse Speed: 90 degrees per second (can be customized)
- Elevation Speed: 60 degrees per second (can be customized)
- Overall Height: Less than 21”
- Overall Weight: Less than 190 lb. with FN® M240B and 250 rounds of ammunition
- Other Info: N x 360 degree traverse; vertical movement range of +80 degrees elevation through -60 degrees depression; up to 20 degrees vehicle mount deviation from the horizontal plane without influencing weapon performance or ammunition bay capacity 200 rounds (5.56x45mm Linked)
FN® EXPERT provides the latest technology based on years of experience with military users and enables the execution of comprehensive rifle marksmanship training. It helps instructors train marksmanship safely and efficiently while also allowing shooters to become skilled after a short period of time.

FN® Expert System transfers the burden of marksmanship fault identification from the human instructor to the training system. It facilitates the correction of faults and enables marksmanship training everywhere and at any time.

Software Strengths

- The result of a shot consists of three key factors: holding, aiming, and triggering. FN® Expert software shows the rifle movement during the aiming and triggering, the score, and the three key factors immediately after the shot in a simple, graphical, and numerical way. The feedback shows the shooters their weak points and helps them correct erroneous habits. This helps shooters at all skill levels quickly improve their shooting skills. The same safe training can be used to enhance the skills of highly experienced shooters.
- Wireless communication (non-tethered)
- Easier and improved target/range scenarios
- Calculations and rendering on optical device
- Improved user interface

FN® EXPERT Leading Edge.

For military, law enforcement, and consumer sales.

Software Strengths

- Supports shooter grouping and zeroing
- Develops and sustains muscle memory
- Supports NCO/SNCO Corps
- Supports STX Lane Training
- Supports all optics and accessories
- Supports dry-fire, CO2, and live-fire training

For military, law enforcement, and consumer sales.
In addition to conventional firearms, FN has developed FN® e-novation – highly added-value solutions that integrate modern and cutting-edge technology, such as optoelectronics, into small arms. These solutions improve combat capabilities and communications during missions, while also easing maintenance logistics and management requirements.

**FN® SmartCore**

An electronic system that measures and records the number of shots (both live and blank firing being discriminated) and effects the firing cycle. Fully automated system with full transparency to the infantrymen. Fully integrated system, with no impact on the balance of the weapon.

- Measures and records the number of shots, and takes into account rates of fire and firing cycles
- Discriminates between shots and other shocks
- Maintenance-free
- Short-range, wireless communication that is undetectable and on request only, so there is no unintentional emission

**FN® SmartCore for FN® M249** includes battery

**FN® SmartCore for FN® SCAR® Family** is self-powered

**FN® SAM**

The FN Small Arms Management software (FN® SAM) takes the records generated and transmitted by the FN® SmartCore to analyze and alert the user of imminent maintenance issues, and it is fully automated software that requires no replacements or manual input. The system compiles all the relevant data, providing information at any time about a weapon and its maintenance, as well as information about replacements on stocks and requests on the weapon.

Using both FN® SmartCore and FN® SAM together allows for reduced operational costs through integrated and optimal management of armurb's level and optimized weapons fleet management.

**FN® SAM SOFTWARE**

The FN Small Arms Management software (FN® SAM) streamlines and saves data about weapons such as maintenance actions and use. It is fully automated software that requires no replacements or manual input. The system compiles all the relevant data, providing information at any time about a weapon and its maintenance, as well as information about replacements on stocks and requests on the weapon.

- FN® SmartCore for FN® SCAR® Family is self-powered

**FN® FCU Mk3**

Designed for both air and ground operations, the FN® Fire Control Unit (FN® FCU) uses advanced electronics to simplify range finding and elevation corrections for the operator, even under extreme combat conditions. The unit is a simple yet advanced sight design for use in both 40mm grenade launchers, stand-alone and under-barrel – and portable antitank weapon.

- Flashing reticle indicator allows correction for left/right weapon cant
- Remotely mounted pressure switch with ruggedized cord connection port
- Housing shape allows use of rifle’s optical and/or iron sights
- Ballistic computer instantly calculates firing solutions and stores up to 50 different types; built-in clinometers sense initial up/down sighting angle; temperature sensor allows a correction in firing solution

FN® FCU Mk3 has been improved through changes based on electronic modules of the latest generation that combine better performance with reduced size and feedback from user experience with the earlier models.

**FN® e-novation**

- FN has over 15 years of experience in the design and manufacture of Fire Control Units
- FN® FCU Mk3 has been improved through changes based on electronic modules of the latest generation that combine better performance with reduced size and feedback from user experience with the earlier models.
- FN® FCU Mk3 includes significant modifications to all its modules: laser range finder, ballistic computer and electronic sight.

**FN® FCU Mk3**

- Undetectable and eye-safe laser range finder effective: 1,000m effective range (1.5 x 1.5m target, 5 km visibility, 28% target reflection)
- Only one battery (CR123)
- Quick release attachment compatible with MIL-STD-1913 rail
- IR laser pointer Class 1/3B
- IR laser safety feature with a dedicated switch or by using a high-visibility blue training cable
WE ARE UNDEFEATED.

No matter what is demanded of our tactical firearms, FN will always deliver.

When the moment demands it, FN’s suite of tactical firearms provides what every professional requires. Designed for the close-in, to-the-perimeter defense, the FN SCAR® offers the perfect variants that can be customized to the challenge. Want overwhelming close-quarters firepower? Reach for the radically advanced FN P90®. It’s compact, spits out the innovative 5.7x28mm round, and exists to win every encounter. Consider too the 40mm Low-Velocity FN40GL®. Employ it stand-alone, or integrate it with the FN SCAR® systems. Add the 5.56x45mm FN 15® Series to your armory. The new family of FN 15® carbines, specifically developed with law enforcement officers’ needs in mind, offer compact builds and shorter barrel lengths that enable faster target engagement and maneuverability in close-quarters scenarios. Choose FN, because there are no compromises to be made in a tactical theater.
Primary Features
- Closed-bolt blowback operation
- Compact bullpup design
- Select fire

Receiver
- Bottom ejection port with dust cover

Barrel
- Cold hammer-forged, chrome-lined barrel
- Integrated flash suppressor with interface for sound suppressor
- Matte black phosphate finish

Stock
- Matte black synthetic thumbhole design with forward handstop
- Front-mounted laser targeting module on LV, TR LV, and USG IR models
- Molded-in rear sling attachment point

Operating Controls
- Ambidextrous cocking knobs and magazine release latches
- Sliding trigger
- Ambidextrous safety/selector switch inside trigger guard

Magazine
- Top-mounted detachable translucent polymer body
- Unique and innovative design allows for compact system when loaded

Specifications
- **FN P90® LV**
  - Caliber: 5.7x28mm
  - Magazine: 30/50 Rd.
  - Barrel Length: 10.39"
  - Sights: Non-magnifying optical; front-mounted visible laser; peep sight
  - Overall Length: 19.88"

- **FN P90® TACTICAL**
  - Caliber: 5.7x28mm
  - Magazine: 10/50 Rd.
  - Barrel Length: 10.39"
  - Sights: MIL-STD-1913 accessory rail; peep sight
  - Overall Length: 19.88"

- **FN P90® USG**
  - Caliber: 5.7x28mm
  - Magazine: 10/50 Rd.
  - Barrel Length: 10.39"
  - Sights: Non-magnifying optical; 2 MIL-STD-1913 accessory rails; peep sight
  - Overall Length: 19.88"

Next Generation in Firepower.
AS9100C/EN9100:2009 certified. For law enforcement and military sales only.

FULL FN P90® SERIES SPECS: PAGE 121

LAW ENFORCEMENT CARBINES
FN SCAR®-SC  Built for Ultimate Mobility and Flexibility.
For law enforcement and military sales only.

**Primary Features**
- Subcompact model derived from the FN SCAR® rifle designed for the U.S. special forces, specifically adapted for security missions
- Rotating, locking bolt
- Selective fire, 550 to 650 rounds per minute (RPM) cyclic rate of fire
- Non-reciprocating charging handle
- Composite polymer trigger module

**Stock**
- Adjustable, bathtub Polymer pistol grip

**Operating Controls**
- Ambidextrous safety lever and magazine release
- Charging handle may be mounted on right or left side
- Enlarged trigger guard for easier access when wearing gloves
- Adjustable gas regulator for use with sound suppressor to maintain constant rate of fire

**Magazine**
- Steel magazine body
- Low-friction follower

FN SCAR®-SC
- Caliber: 5.56x45mm NATO
- Mag Capacity: 30 Rd.
- Weight: 6.9 lb.
- Barrel Length: 7.5"
- Overall Length: 25.7" (extended); 21.1" (collapsed)

**FN SCAR®-SC SPECS: PAGE 122**

---

FN SCAR® 16/FN SCAR® 17  Modular, Accurate, and Adaptable.

**Primary Features**
- Rotating, locking bolt; select fire
- Composite polymer trigger module
- Short-stroke gas piston

**Receiver**
- Hard-anodized monolithic aluminum receiver
- MIL-STD-1913 accessory rails at 3, 6, 9, and 12 o'clock positions
- Adjustable folding front and folding/removable rear backup iron sights

**Barrel**
- Cold hammer-forged, chrome-lined, free-floating barrel
- Standard or Close Quarters Combat (CQC) options

**Stock**
- Adjustable for six-position length of pull
- Adjustable for two-position cheekpiece height
- Side-folding for aircraft and vehicle deployments; can still be fired from the folded position

**Operating Controls**
- Ambidextrous selector lever and magazine release
- Charging handle may be mounted on right or left side
- M203-type unlocking catch
- Adjustable gas regulator for use with sound suppressor to maintain constant rate of fire

**Magazine**
- Steel body; low-friction follower
- Extended base pad for improved ergonomics (FN SCAR® 17)

FN SCAR® 16 STANDARD
- Caliber: 5.56x45mm
- Weight: 26 lb.
- Overall Length: 38.0" (extended); 35.5" (collapsed); 28.0" (folded)
- Cyclic Rate of Fire: 600 RPM
- Effective Range: 700m point target
- Barrel Length: 16.0"
- Black or Flat Dark Earth

FN SCAR® 16 CQC
- Caliber: 5.56x45mm
- Weight: 26 lb.
- Overall Length: 35.0" (extended); 32.5" (collapsed); 25.0" (folded)
- Cyclic Rate of Fire: 625 RPM
- Effective Range: 500m point target
- Barrel Length: 13.0"
- Black or Flat Dark Earth

FN SCAR® 17 STANDARD
- Caliber: 7.62x51mm
- Weight: 29 lb.
- Overall Length: 35.0" (extended); 32.5" (collapsed); 25.0" (folded)
- Cyclic Rate of Fire: 625 RPM
- Effective Range: 600m point target
- Barrel Length: 14.0"
- Black or Flat Dark Earth

FN SCAR® 17 CQC
- Caliber: 7.62x51mm
- Weight: 29 lb.
- Overall Length: 31.0" (extended); 28.5" (collapsed); 21.0" (folded)
- Cyclic Rate of Fire: 625 RPM
- Effective Range: 400m point target
- Barrel Length: 10.0"
- Black or Flat Dark Earth

FN SCAR®-SC
- Caliber: 5.56x45mm NATO
- Mag Capacity: 30 Rd.
- Weight: 6.9 lb.
- Barrel Length: 7.5"
- Overall Length: 25.7" (extended); 21.1" (collapsed)

**FN SCAR®-SC SPECS: PAGE 122**
Primary Features
- Single-shot manual cocking
- Rotating, locking breech system
- Composite polymer trigger module

Receiver
- Advanced, ergonomically correct microphone
- Microphone stowed for arming purposes

Breech
- Rear sight and leaf sight located on the firing position grip area
- Use of extended length ammunition

Stock
- MIL-STD-1913 accessory rails at 0, 6, 9, and 12 o'clock positions
- Non-slip grip design of wood stock, allows for a variety of comfort body sizes
- Stock and forend allow for multiple holding positions

Operating Controls
- Fully ambidextrous
- Cylindrical safety for fast and easy operation
- Enhanced trigger guard for easier extraction when wearing gloves
- Double-action trigger offers multiple-strike capability to eliminate requirement to open and recock action; allows firing of ammunition with less sensitive or aged primers

Mounting
- Bipod or a standard bipod can be attached
- Add no weight when mounted on FN SCAR® 16 or FN SCAR® 17

Length
- 26.5" (extended); 20.5" (collapsed)
- Stock Color: Black or Flat Dark Earth

FN40GL® Power and Ready for Any Mission.

AS9100C/EN9100:2009 certified. For law enforcement sales only.

5.7x28mm AMMUNITION

The New Benchmark in Ammo Performance
ISO 9001 Quality

Fully compatible with a wide variety of FN firearms, including the FN Five-seveN® pistols, FN PS90® carbines and FN P90® submachine guns, the 5.7x28mm cartridge has been especially designed to meet FN's demanding performance criteria. The SS195LF and SS198LF marauder-innovative lightweight, brass-and-aluminum alloy, fumigated bullet design - deliver unrivaled accuracy and performance from the muzzle to the target. FN also offers 5.7x28mm restricted ammunition (duty, tracer, subsonic) for law enforcement and military uses only. The SS190 duty round has been specially designed to minimize the risk of over-penetration. The L191 tracer and SB193 subsonic rounds, as well as blank rounds for training and simulations, are also available from FN. All restricted ammunition is only released and shipped from a U.S. Customs-Controlled Bonded Warehouse (CBW) upon BATFE and U.S. Customs approval.

The hollow point jacket contains a lead-free metal core. The primer compound is also lead-free, making either round ideal for any location where lead contamination is to be avoided.

CROSS-SECTION OF THE UNRESTRICTED LEAD-FREE 5.7x28mm CARTRIDGES

SS195LF
Prod #: 10700012

The 2019 FN product line has much to offer our customers. If you have any questions about the products within this catalog, purchasing information, or company programs, contact us at:

1.800.635.1321 • INFO@FNAMERICA.COM • FNAMERICA.COM/CONTACT-US

FN products are manufactured in the U.S. by FN America, LLC, in Columbia, SC, and in Belgium by FN Herstal, S.A. FN America is passionately committed to providing innovative firearms that are trusted to reliably perform and safeguard lives. This catalog represents FN’s product offerings for U.S. military, law enforcement, and civilian markets.

Every reasonable effort has been made to ensure that all product photographs, descriptions, and specifications within this catalog are accurate; however, inadvertent errors may occur, and changes in design or materials due to our continual effort to improve products may result in some changes in specifications before subsequent publications are issued. FN reserves the right to modify or change specifications without notice. Some FN products shown in action photos in this catalog may be equipped with user-supplied, optional accessories. If you have any questions regarding FN products, please visit FNAMERICA.COM or contact us directly. Copyright © 2018 FN America, LLC. All rights reserved.

No part of this catalog, including documents, information, photographs, specifications, technical diagrams, or other descriptive information, shall be reproduced, adapted, translated, entered into a database, or released to the public, whether in whole or in part, without the prior written permission of FN Herstal, S.A. and/or FN America, LLC. All trademarks, service marks, logos, brand names, and copyrights used in this catalog are owned by FN Herstal, S.A. and/or FN America, LLC – except where otherwise specified – and may not be used, copied, reproduced, republished, uploaded, sent, transmitted, sold, or altered in any way without the prior written permission of FN Herstal, S.A.; FN America, LLC; and/or any third-party trademark or copyright owner, as the case may be. Some of the models displayed in this catalog may not be available worldwide, depending on the range of products available in the countries of origin and/or destination. In this regard, FN Herstal, S.A., and FN America, LLC, shall not be responsible for any international restrictions.
